XXX..
NEW SCHEDULE OF SUBMISSION AND OPENING OF BIDS
25 September 2020, 2:00PM
XXX..

Below are the queries/requests for consideration by the prospective bidders, which have been answered by the PITC Bids and Awards Committee I and Philippine Army (PA).

AGM GLOBAL DIVISION in its letter dated 30 June 2020 and received by BAC on the same date.

Query 1:	<p>AGM Global Vision is an ISO 9001-2015 self-certified original equipment manufacturer of image intensified, thermal imaging, laser emitting, and other specialized electro-optical devices. AGM Global is self-certified under the auspices of the US Defense Contracting Management Agency for contract SPRBL1-18-R-0048. The DCMA reviewed the Quality Management Systems, audited the procedures and record-keeping metrics and approved the QMS for Defense for Logistics Agency contract SPRBL1-18-R-0048 for AN/PVS-14 Monocular Night Vision Devices. The POC at DCMA is as follows:</p> <p>Defense Contract Management Agency DCMA Western RC POC: Ms. Rozina Escobosa 40 N. Central Avenue, Suite 400 Phoenix, AZ 85004 USA</p> <p>If you have any questions or need additional clarification, please do not hesitate to contact me directly.</p>
----------	--

BAC1/PA:	Please be informed of the required submission of ISO Certification under Section III of Bid Data Sheet Clause 12.1 B. Technical Documents to read as. <i>“iv. Valid and current ISO Registration Certificate (at least ISO 9001:2015) for manufacturing issued by an independent certifying body in the name of the manufacturer”.</i>
----------	---

UNIMASTERS CONGLOMERATION INCORPORATED in its letter dated 18 August 2020 and received by BAC on the same date.

Query 1:	<ol style="list-style-type: none">1. For the test parameter under Environmental Requirements – Shockproofness (page 87 of the bid data sheet), can we request on how this will be tested? How high will the binoculars be dropped? On what surface will the binoculars be dropped? How many times will it be dropped?2. For the test parameter under Environmental Requirements – Waterproof (page 87 of the bid data sheet), can we request on how this will be tested? How long and how deep will the Binoculars be submerged? How many times will it be submerged?3. For the test parameter under Environmental Requirements – Fogproof (page 87 of the bid data sheet), can we request on how this will be tested? How long and how deep will the Binoculars be submerged? How many times will it be submerged?4. For the test parameter under Environmental Requirements – Low and High Temperature (page 87 of the bid data sheet), can we request on how this will be tested? What are the temperatures will the binoculars be exposed to? How long will the item be exposed to these temperatures? How many times will it be exposed to these temperatures?5. For the test parameter under Environmental Requirements – Corrosion Resistance (page 87 of the bid data sheet), can we request on how this will be tested? How long and how deep will the Binoculars be submerged in seawater? How many times will it be submerged? <p>Also, we would like to request for minor alterations in the following specifications. Please note that our requests will not alter the purpose and functionality of the binoculars.</p> <ol style="list-style-type: none">6. For the test parameter under Accessories (page 87 of the bid data sheet), can we request that the “pocket with elasticated feature” be replaced with just a “pocket”? As long as the pocket will serve the same purpose of placement of a few small items, there is no need to add the elastic feature of the pocket.7. For the test parameter under Rain Guards (page 88 of the bid data sheet), can we request the “flexible bridge between the two eyecups” be replaced it with “any rain guard that can take up the slack and can fix to the eyecups regardless of the IPD setting”, since it will still serve the same purpose.8. For the test parameters under Rain Guards (page 88 of the bid data sheet), can we request that the “2 rain guard loops requirement be altered to just “1 rain guard loop”? The rain guard needs to be attached to just 1 loop at any given time to serve its purpose. And as long as the rain guards can be attached to the strap, it will serve the same purpose as the rain guard with 2 loops.
----------	--

	<p>9. For the test parameters under Neck Strap/Harness (page 88 of the bid data sheet), can we request that “neck strap with quick release buckle” be just “neck strap”? If the user wants the binoculars to be removed, the user can just remove the strap over their heads to do so. As long as the neck strap can easily be removed, it will serve the same purpose compared to having the quick release buckle.</p> <p>Since the project is on its 4th rebid, allowing some flexibility in the specifications without altering the function of the item will increase the chance of a successful bid. The requests mentioned above still serve the purpose of the binoculars, since the previous specifications are more on aesthetics rather than function.</p>
BAC1/PA:	<p>Please check Annex V-A3 Test and Evaluation Procedure (TEP) of the Bidding Documents. This contain the Laboratory Test Methods of SGS on the following Test Parameters:</p> <ul style="list-style-type: none">a. Shockproofnessb. Waterproofnessc. Fogproofd. Low and High Temperaturee. Corrosion Resistance <p>Request for minor alterations on some specifications is DENIED.</p>

This **Supplemental Bid Bulletin No. 4** shall form part of the Amended Bidding Documents. Any provisions in the Amended Bidding Documents inconsistent herewith is hereby amended, modified and superseded accordingly.

For guidance and information of all concerned.

Issued this 14th day of September 2020 in Makati City.
